

RASHID SAID RASHID AL BALUSHI

Electrical Engineer | Technical Operations Specialist | IoT Control System | Electrical Specialist

Muscat, Sultanate of Oman | Phone: +968 99214599 | Email: rsralbalushi@gmail.com

PERSONAL SUMMARY

A motivated Electrical Power Engineering Fresh Graduate (2026) with a strong interest in technology, automation, and smart systems. Skilled in electrical systems, IoT, troubleshooting, and technical support, with hands-on experience in building monitoring and automated systems using microcontrollers. A quick learner with good problem-solving skills, able to work well under pressure and adapt to latest technologies. Looking forward to growing professionally and contributing to a successful and innovative work environment.

EDUCATION

Advanced Diploma in Electrical Power Engineering

2026

University of Technology and Applied Sciences (UTAS), Oman

WORK EXPERIENCE

Internship – Nama Electricity Distribution

Jun 2025 – Aug 2025

Operations Department

- **Operational Support:** Assisted in the real-time monitoring and maintenance of electrical distribution networks, ensuring high system availability.
- **Technical Troubleshooting:** Participated in diagnosing and resolving faults within complex power systems and protective relays.
- **Documentation & Compliance:** Supported operational documentation and safety inspections in compliance with utility standards, similar to IT standard operating procedures (SOPs).

PROJECTS & INNOVATIONS & CERTIFICATIONS

Remote Monitoring & Protection System (IoT): Designed a real-time system for monitoring electrical parameters. Implemented data integration and remote alert features, showing ability in connectivity and sensor-based automation.

Automated Irrigation System: Developed a moisture-controlled automated system. **Awarded Best Project (2022-2023)** for innovation in automation and efficiency.

TECHNICAL SKILLS (TAILORED FOR APPLICATIONS OPS)

- **Systems & Infrastructure:** Basic understanding of Linux-based systems (through IoT projects), Server-side logic, and Cloud monitoring concepts.
- **Automation & Scripting:** Proficient in C/C++ (Arduino), Python (for IoT/Data), and logic-based programming (PLC/SCADA).
- **Technical Troubleshooting:** Expert in fault analysis, root cause diagnosis, and systematic problem-solving in high-pressure operational environments.
- **Applications & Tools:** Microsoft 365, AutoCAD Electrical, and familiarity with data integration via APIs in IoT projects.

Language: (Arabic – English)
